

OneMind Dogs Techniques 1 Agility Workshop

with Nancy Schilling, OneMind Dogs Instructor
January 26 & 27, 2019 9 am to 5pm

This 2-day workshop focuses on 8 different OneMind Dogs techniques.
Day 1 includes the Front Cross, Backside Send, False Turn and Blind Cross.

Day 2 includes the Lateral Push, Rear Cross, Whisky Cross and Reverse Spin.
Participants will learn the 8 handling techniques and coursework application.

In this workshop handlers will develop a better understanding of agility from the dog's perspective. You will learn the 3 C's: Connection, Commitment, Cue, and the seven elements of handling to more effectively and efficiently guide your dog through a course with clear communication that dogs naturally understand. You will improve your technical mechanics of each technique regardless of your level and learn how to commit your dog to obstacles sooner and stay ahead on course. For each technique, there is an explanation and discussion, 'human dog' training, virtual dog training, real dog training, and coursework training. Jumps and tunnels will be used.

Training is individualized for each team with personalized feedback. The techniques will be broken down in fine detail and each student will advance at their individual level.

Each registered participant (working and auditors) will have access to pre-seminar info and videos on the OneMind Dogs website.

Open to all levels Beginner to Masters.*

**Dogs must be proficient on jumps and tunnels; remedial obstacle training will not be part of the curriculum. Dogs should be able to perform sequences of 8-10 obstacles. Contacts and weaves will not be used.*

WORKSHOP FEES: Workshop is scheduled from 9 am to 5 pm each day.

Working Spots (both days): DTCCC Members-\$320 Non-Members \$350
